

BlueBin® Kanban

RIGHT SUPPLIES, RIGHT TIME

Adapted from successful manufacturing and retail industries, BlueBin Kanban is a visual replenishment system that helps ensure supplies are delivered to the right place, in the right quantity, at the right time. This process provides immediate, tangible, and measurable advances in lean growth, removing ambiguities and overcompensation of supply systems.

SPEED TO QUALITY TRANSFORMATION

BlueBin

SUPPLY CHAIN MANAGEMENT
by Capgemini Healthcare

Transformation SIMPLE • AFFORDABLE • RELIABLE • EFFECTIVE

Clinical staff are removed from all supply chain management activities. They simply have what they need, when they need it.

Hoarded supplies are eliminated; program delivers supplies where they are needed to optimize clinical workflow.

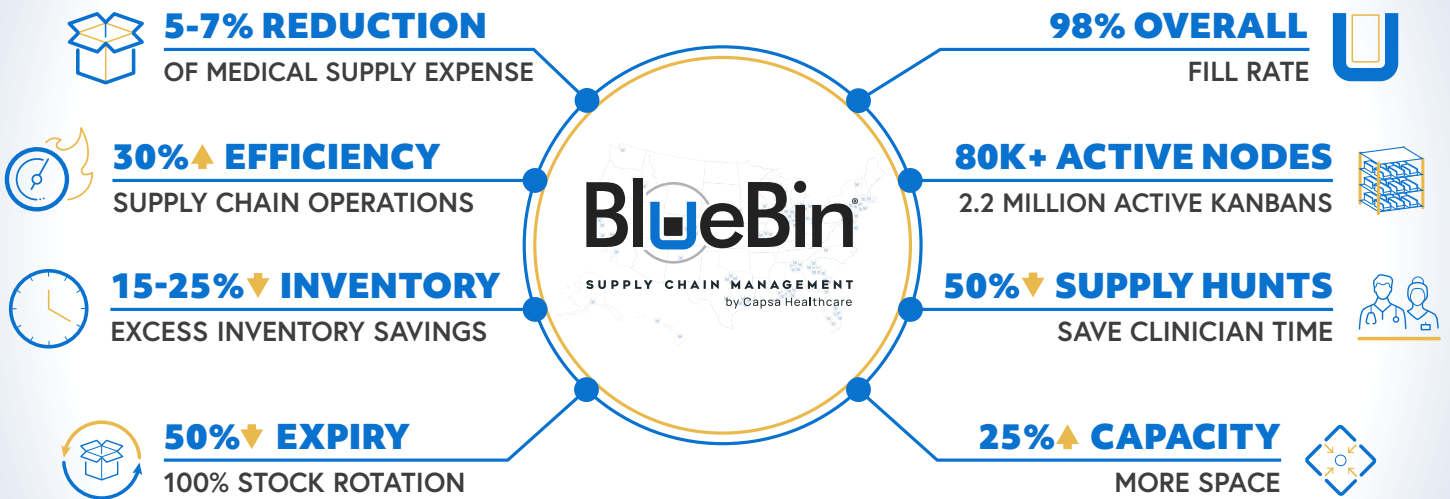

Stocking levels are analyzed daily to ensure supply standards are maintained, and there are never excess or expired products.

Stock-outs and rush orders are virtually eliminated. The management system refines the program, driving continuous improvement.

Sanitization with every order and the elimination of bringing totes or corrugated cardboard into the node greatly reduces the risk of infection.

BlueBin Mission: At BlueBin, we are dedicated to revolutionizing the healthcare supply chain landscape. Our cutting-edge technologies and tailored solutions empower healthcare providers to optimize their operations, reduce waste, and enhance patient care.
