Transform your healthcare supply chain with bluebin consulting, training, and certification

➤ **Hardware**

Low priced hardware (racks, bins, etc.) for any DIY Kanban and/or Par Cart solution

Supply Chain Transformations

BEFORE

AFTER

BlueQ Labeler

Print all program labels through the BlueQ app. Pulls data from ERP to create standard Kanban labels. Create & print standard node signage, as well as free-form labels as needed.

BlueQ TimeMgr

Helps understand process takt time, inform route optimization decisions, training needs, etc.

Planning & Design

BlueQ Pulse

Rapid-fire analytics at your fingertips

Quicker, easier, better visualization, the ability to create new/custom reports...opens capacity for BlueBin to create and deliver new standard reports/dashboards.

BlueQ SmartScan

- Enables **real-time** dashboard data
- **Order entry** built for Kanban (A vs B bin rotation metrics)
- Places orders for traditional PAR Carts in addition to Kanban
- **Captures any information** needed for outgoing Purchase Orders
- **Receiving and Delivery** module tracks package from dock to delivery
- **Inventory module** for pick, put, direct issues, and cycle counts
